

ON TUESDAY 28TH
SEPTEMBER WE WENT OUT
TO LOOK IN THE
ROCKPOOLS AND FIND
SOME COOL CREATURES.

COOL! I DIDN'T
KNOW THAT

ST. ANDREWS

THROUGHOUT THE DAY WE
SAW LOTS OF CREATURES
INCLUDING
STARFISH, SHRIMPS, CRABS
AND SEA ANEMONES

AND THIS
IS...

A photograph showing two crayfish in a clear tank. The crayfish are dark with yellowish-orange markings on their bodies. They are positioned in the upper left and center of the frame. A blue tube is visible in the top left corner. The background is a light-colored wall with a grid pattern.

A LOT OF PEOPLE
THOUGHT THE
LOBSTERS WERE COOL

AT THE LAB

A photograph of a large, brownish-orange starfish in a clear tank. The starfish is the central focus, with its five arms spread out. In the background, there is a piece of equipment with a 'CE' mark. The tank is filled with water, and the background is a light-colored wall.

WE GOT A WONDERFUL CHANCE
TO SEE LOTS OF CREATURES.

Thank you for a great day
